EFFICIENCY IN SIMPLICITY

Our newest wall system is specifically designed to cater to larger display cases.

THE MINIMALIST APPROACH TO DESIGNING EFFECTIVE SOLUTIONS

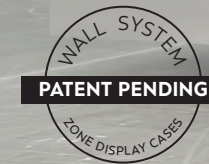

Our approach to designing the wall system is revolutionary and unparalleled in its features. The result is a wall system that features simple mechanics, streamlined structure, impressive load capacity and effortless ease of use.

This system surpasses museum conservation standards, making it the ideal solution for preserving valuable artifacts.

MAXIMIZING EFFICIENCY THROUGH LESS

By minimizing the mechanics and optimizing the use of each component, we have achieved simplicity in operation and maximized the system's efficiency.

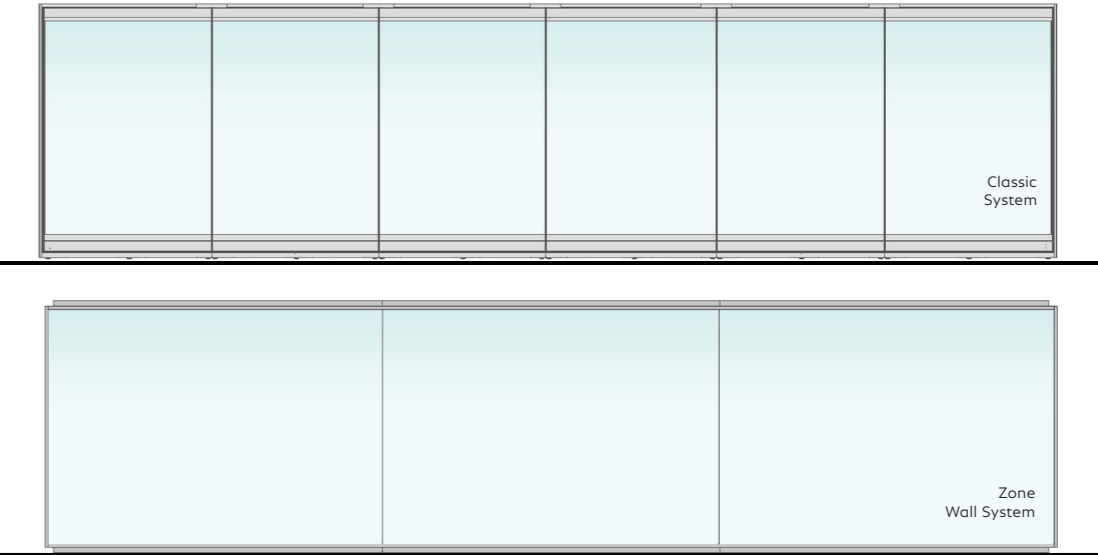

BRINGING YOUR COLLECTIONS TO THE FOREFRONT

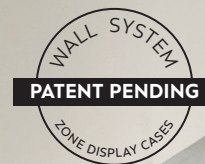

The clean lines of the display case not only complement the content, but it also enhances the overall visitor experience.

By effectively supporting the weight of large glass panels, the system reduces the number of visible joints and doors by approximately 50%, compared to conventional systems.

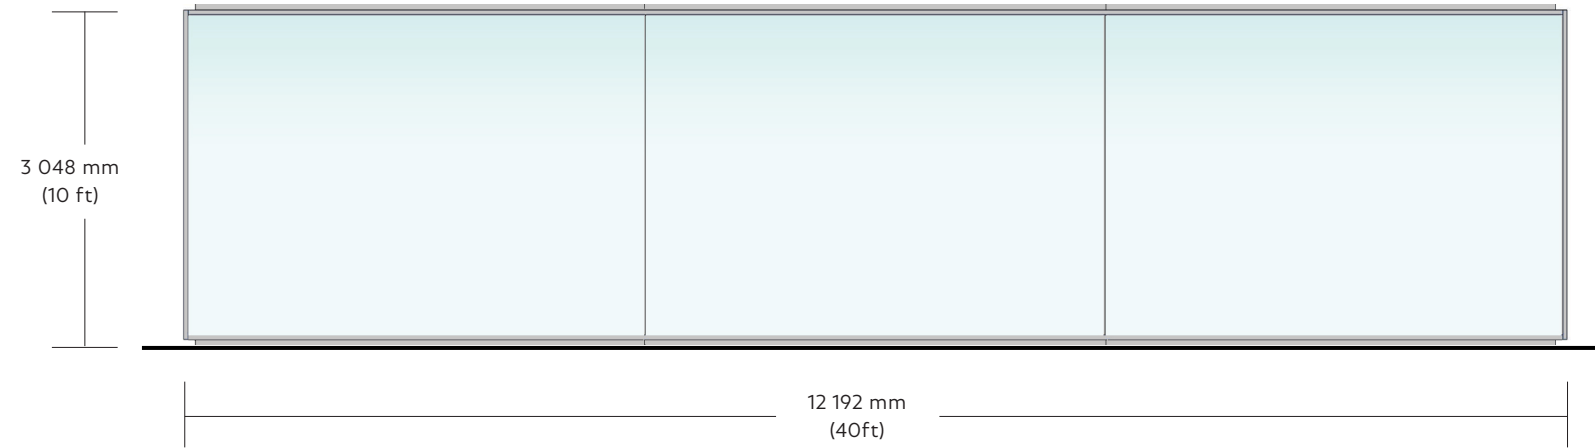

DESIGNED FOR EASE-OF-USE

Its intuitive design allows a single person to effortlessly perform all the required operations to open the display case without exerting much effort.

CAPACITY & DIMENSIONS

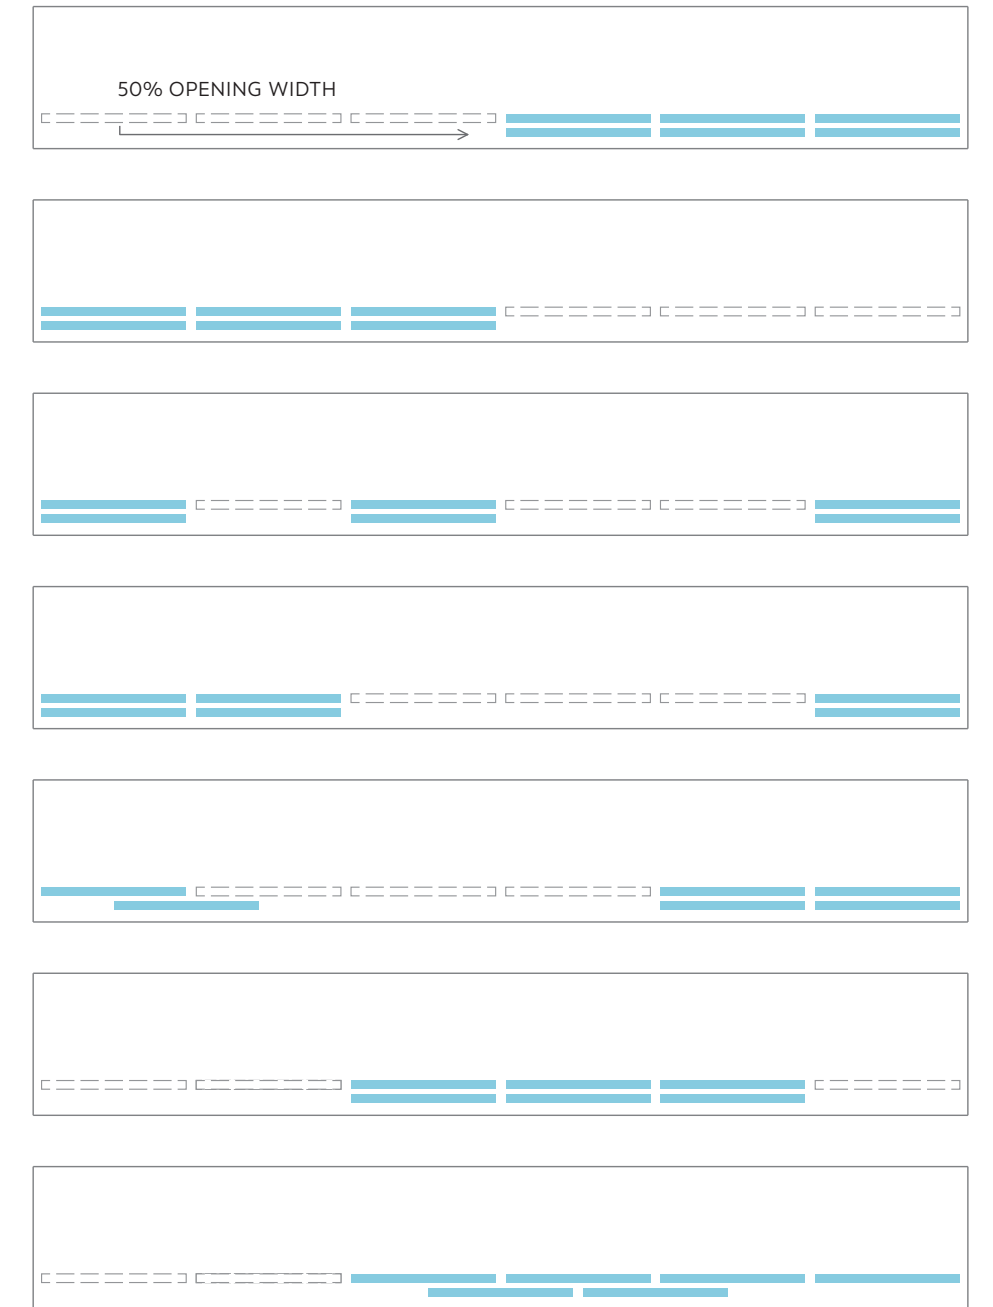

GLASS DOORS	2,4 to 3,6 meters (8 to 12 feet) for both width or height
WEIGHT LIMIT	1000 pounds (454 kg) per door

THE UNIQUE FEATURE ADVANTAGE

The opening mechanism is designed independently of the structure, providing flexible access with multiple opening options.
