ZF-301

Freestanding Wall Case

The ZF-301 is a highly versatile display case for presenting a wide variety of objects, whether small or large and light or extremely heavy, such as rocks and minerals, musical instruments, fossils, weapons, costumes or even furniture.

Its C-Frame steel structure allows for insertion of heavy-duty hinges that can support very large glass doors. The ZF-301 can be surface-mounted, partially or fully recessed into a wall.

ZF-301

Freestanding Wall Case

Available in multiple depths, heights and lengths, these freestanding wall cases can be used as single units or in multiple sections to create long display walls. Corner sections are also available. This model can be designed with glass or solid sides to accommodate your exhibit needs.

Their solid back walls can be used to pin and hang objects, or to apply graphics. They are removable and can be repainted and prepared for future exhibitions.

Regardless of its dimensions, this beautiful design offers several display possibilities with adjustable shelving, storage and lighting options. They could also integrate various sensors and alarm systems. Customized plinths and risers, or even exhibition drawers, can be a great addition to increase versatility and display surface.
